

## Tent Policy

### Tents:

Before a tent can be installed, you **must** call 811 to have the site checked for underground utilities. Please allow 1-2 weeks advance notice. The site must be marked before a tent can be set up. This requirement is for your protection as well as the safety of our workers.

The tent will not be set up under any tree that sheds any organic material or over pet waste. We cannot stake a tent into concrete or sand and will not be responsible for damage to asphalt.

If you choose to do the setup yourself you accept all liability.
